

VICE JAW MOULDS

Adjustable steel mould for casting Jaws in lead up to 6 inches wide.

The mould has a graduated scale and quick release clamping handle to establish and secure the required mould size for pouring.

Designed to last a lifetime.

Note:

- 1. Use all necessary safety precautions when pouring molten lead, i.e., full-face mask, appropriate clothing and gloves etc.**
- 2. Warm mould before use to allow for an even casting of the lead.**
- 3. Use in a well ventilated area.**
- 4. Do not cool the mould during use in water, (only when moulding is finished).**
- 5. This device is not to be used by untrained personnel.**
